

UNVEILING AESTHETICS

MD Aesthetics offers rejuvenation you can believe in.

Specializing in the latest, most effective non-invasive treatment strategies for anti-aging and skin rejuvenation for men and women, Whitby's MD Aesthetics keeps you looking your best. With 20 years of medical experience, a Pharmacy degree in Pharmaceutical Chemistry and Compounding from Rhodes University, a Medical MD degree (Bachelor of Medicine, Bachelor of Surgery) from the University of Cape Town, and membership within the College of Physicians and Surgeons of Ontario, Dr. Copeland, owner of MD Aesthetics, took the natural step, and began practicing aesthetic medicine in 2001.

Since then he has been committed to providing his clients with clinically tested and proven, non-surgical, no down-time means to combat the signs of aging and improve appearance.

MD Aesthetics offers the full spectrum of advanced laser and skin care treatments, including Botox® Cosmetic injections for wrinkles, laser hair removal, dermal fillers for wrinkles and lip augmentation, PhotoFacials, cellulite reduction using ELOS VelasMOOTH® technology and Mesotherapy injections, chemical peels, microdermabrasion and laser treatments for leg veins. Dr. Copeland performs Botox® injections daily to eliminate wrinkles of the face and neck. He also performs therapeutic Botox® injections for the treatment of hyperhidrosis [excessive sweating] of the underarms, hands and head," relates Rhonda Reid, Operations Manager and Laser Consultant for MD Aesthetics. MD Aesthetics also offers safe and effective laser hair removal treatments for both men and women, which are performed by highly trained and experienced medical technicians. "With the advantage of being able to choose from three state of the art technologies, treatments can be tailored to match your skin and hair type for optimal results. No single laser will be right for everyone," reports Reid.

For those looking for younger, brighter skin, MD Aesthetics offers PhotoFacials, an innovative technology which uses intense pulsed light (IPL) for

the treatment of skin conditions associated with aging, active life-styles, and sun damage. Designed to produce younger and healthier looking skin, this treatment can safely and effectively eradicate facial veins, improve Rosacea and flushing, treat age, sun spots and fine facial lines, and improve pore size, skin tone, and texture. At MD Aesthetics, one can also procure medical grade chemical peels to help restore wrinkled, sun-damaged, blemished, acne scarred skin by peeling away damaged outer layers. "New skin cells and collagen are stimulated, resulting in smoother, tighter, and younger looking skin," says Reid, adding "the type and depth of peel is

customized according to patient skin type, sensitivity, and desired outcome."

Dr. Copeland and his highly trained medical technicians can also help women who are affected by cellulite—more than 80 per cent of the population. Using VelaSmooth's patented breakthrough ELOS technology, it is possible to reduce the appearance of cellulite and recontour problem areas of the body without surgery or downtime.

Listed as one of the recommended injector physicians by Allergan—the manufacturer of Botox®—Dr. Copeland personally administers all injectables, including Botox®, Restylane®, Juvaderm® and Mesotherapy and regularly attends upgrading seminars and workshops focused on advanced techniques for experienced injector physicians. Reid furthers, "By working closely with the technical team at Allergan, he is trained to use cutting edge techniques ensuring the best possible results for his clients. Other services are performed by certified medical technicians and aestheticians who have been certified on all technologies and have had extensive training and experience under the supervision of Dr. Copeland."

Always revolutionary, MD Aesthetics regularly adds new treatments and services to their roster. Their newly listed technologies include an Nd Yag laser by Sciton and Elos® technology from Syneron. They have also expanded their services to include laser treatments of leg veins, hair removal from a choice of three systems, advanced Botox® techniques, and a range of new dermal fillers. With a full-time physician always on-site, MD Aesthetics always ensures the highest quality of care and safety, and every client receiving treatment will be seen and assessed by Dr. Copeland.

So, whatever aesthetic enhancement you are looking for, MD Aesthetics can help to unveil a younger, healthier looking you.
